Commission

Statistical report— Annual Wage Review 2021–22

All Australian Bureau of Statistics (ABS) data in this Report are seasonally adjusted, unless otherwise noted.

All data expressed in \$ units are in nominal terms, unless otherwise noted.

All gross domestic product (GDP) and gross value added (GVA) measures used in this Report are expressed in real terms from chain volume estimates, unless otherwise noted.

This report uses unit record data from the Household, Income and Labour Dynamics in Australia (HILDA) Survey conducted by the Melbourne Institute of Applied Economic and Social Research at the University of Melbourne on behalf of the Australian Government Department of Social Services (DSS), with data collection conducted by Roy Morgan Research. The findings and views reported in this paper, however, are those of the authors and should not be attributed to the Australian Government, DSS, or any of DSS' contractors or partners. List of abbreviations

Abbreviation	Description
ABS	Australian Bureau of Statistics
AAWI	Average annualised wage increase
AWE	Average Weekly Earnings
AWOTE	Average Weekly Ordinary Time Earnings
C4	Engineering Association Level I, <i>Metal, Engineering and Associated Industries Award 1998</i> ; from 1 January 2010 the <i>Manufacturing and Associated Industries and Occupations Award 2010</i> ; and from 29 May 2020 the <i>Manufacturing and Associated Industries and Occupations Award 2020</i>
C10	Engineering Tradesperson Level I, <i>Metal, Engineering and Associated Industries Award 1998</i> ; from 1 January 2010 the <i>Manufacturing and Associated Industries and Occupations Award 2010</i> ; and from 29 May 2020 the <i>Manufacturing and Associated Industries and Occupations Award 2020</i>
C14	Engineering/Production Employee Level 1, <i>Metal, Engineering and Associated Industries Award 1998</i> ; from 1 January 2010 the <i>Manufacturing and Associated Industries and Occupations Award 2010</i> ; and from 29 May 2020 the <i>Manufacturing and Associated Industries and Occupations Award 2020</i>
COE	Characteristics of Employment
COVID-19	Coronavirus disease 2019
CPI	Consumer Price Index
EEH	Employee Earnings and Hours
FMW	Federal Minimum Wage
FOB	Free on board
FT	Full time
FWCFB	Fair Work Commission Full Bench
GDP	Gross domestic product
GVA	Gross value added

IMF	International Monetary Fund
JSP	JobSeeker Payment
LCI	Living Cost Index
n/a	Not available
NMW	National minimum wage
NSA	Newstart Allowance
OECD	Organisation for Economic Co-operation and Development
PT	Part time
PL	Poverty line
PPP	Purchasing Power Parity
ppt	Percentage point
Pw	Per week
RBA	Reserve Bank of Australia
RNNDI	Real net national disposable income
UK	United Kingdom
US	United States
WAD	Workplace Agreements Database
WPI	Wage Price Index

Overview

Indicator	Measure	Latest	5-year average
		Sep qtr 2021	
GDP	Annual % change	3.9	1.6
RNNDI	Annual % change	7.8	3.4

1. Economic growth

Chart 1.1: Economic growth, annual and quarterly growth rates

Source: ABS, Australian National Accounts: National Income, Expenditure and Product, September 2021.

Chart 1.2: Components of GDP growth, September quarter 2021

Note: Household consumption refers to 'Household final consumption expenditure', Investment refers to 'Gross fixed capital formation', and Public demand refers to 'General government final consumption expenditure'. Contributions may not add to total GDP growth due to rounding.

Source: ABS, Australian National Accounts: National Income, Expenditure and Product, September 2021.

Chart 1.3: International comparisons of quarterly GDP growth rates

Source: OECD (2021), *Quarterly GDP (indicator)*, <<http://data.oecd.org/gdp/quarterly-gdp.htm>>.

Chart 1.4: Real net national disposable income, real GDP and the terms of trade, index

Note: Real net national disposable income (RNNDI) takes into account the impact of changes in prices of exports relative to imports, the real impact of income flows between Australia and the rest of the world, and the consumption of fixed capital. Income flows between Australia and the rest of the world are fairly smooth over time and changes tend to have little impact on short-term movements in RNNDI. The consumption of fixed capital tends to stall growth in RNNDI but, for the most part, the impact on short-term movement is small. See ABS, *Real net national disposable income - a new national accounts measure*, Feature article in ABS, *Australian National Accounts: National Income, Expenditure and Product*, December 2001.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021.

Chart 1.5: Gross value added by industry, average annual growth over decade, growth over year to the September quarter 2021 and growth in the September quarter 2021

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021.

Chart 1.6: Gross fixed capital formation share of GDP

Note: All data are expressed in nominal and annual terms. Non-mining market sector excludes Education and training, Public administration and safety, Health care and social assistance and Mining, but includes ownership of dwellings.

Source: ABS, *Australian System of National Accounts*, 2020–21 financial year.

Table 1.1: Gross value added, by industry

	September qtr 2020	June qtr 2021	September qtr 2021
	(\$m)	(\$m)	(\$m)
Agriculture, forestry and fishing	9715	13 080	13 263

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021.

Chart 1.8: Household spending, monthly and annual growth, current price, calendar adjusted

Note: Calendar adjusted estimates account for trading day impacts and length of month. As the indicator time series lengthens, seasonally adjusted estimates will become available.

Source: ABS, *Monthly household spending indicator*, December 2021.

Chart 1.9: Household spending by spending category, annual growth, current price

Note: Calendar adjusted estimates account for trading day impacts and length of month. As the indicator time series lengthens, seasonally adjusted estimates will become available. Until such time, it is advised to focus on the through the year movements.

Source: ABS, *Monthly household spending indicator*, December 2021.

2. Productivity

Chart 2.1: Measures of productivity, indexes—Dec-11 = 100

Note: Labour productivity is measured as real GDP per hour worked. Gross value added measures the value of output at basic prices minus the value of intermediate consumption at purchasers' prices. The market sector includes all industries except for Public administration and safety, Education and training and Health care and social assistance.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021.

Table 2.1: Measures of productivity, growth rate over the year

	GDP per capita	RNNDI per capita	GDP per hour worked	GVA per hour worked—market sector
Quarter	(% change)	(% change)	(% change)	(% change)
Dec-11	1.8	4.0	2.7	3.0
Dec-12	1.0	-1.8	1.7	3.6
Dec-13	0.8	0.3	2.1	1.8
Dec-14	0.6	-1.9	1.7	2.6
Dec-15	1.2	-2.4	0.2	0.9
Dec-16	1.0	4.9	1.5	1.9
Dec-17	0.8	0.0	-1.0	-1.5
Dec-18	0.7	2.2	0.9	1.6
Dec-19	0.8	1.9	0.3	-0.3
Dec-20	-1.3	2.3	1.6	2.6
Sep-21	3.5	7.4	1.7	3.1

Note: The percentage change is calculated in relation to the corresponding quarter of the previous year.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021.

Table 2.2: Productivity growth and its components, growth rate over the year

Quarter	National Accounts						Labour Force
	Total			Market Sector			Hours worked
	GDP	Hours worked	GDP/hour worked	GVA	Hours worked	GVA/hour worked	Hours worked
	(% change)	(% change)	(% change)	(% change)	(% change)	(% change)	(% change)
Dec-11	3.5	0.8	2.7	4.0	0.8	3.0	1.2
Dec-12	2.8	0.9	1.7	3.6	-0.1	3.6	0.5
Dec-13	2.5	0.3	2.1	2.3	0.6	1.8	0.5
Dec-14	2.1	0.4	1.7	2.2	-0.3	2.6	0.2
Dec-15	2.7	2.5	0.2	2.6	1.7	0.9	2.7
Dec-16	2.7	1.2	1.5	2.2	0.3	1.9	1.0
Dec-17	2.3	3.4	-1.0	2.4	4.0	-1.5	3.2
Dec-18	2.3	1.4	0.9	1.8	0.3	1.6	1.7
Dec-19	2.3	2.0	0.3	2.1	2.4	-0.3	1.5
Dec-20	-0.8	-2.3	1.6	-2.2	-4.6	2.6	-1.8
Sep-21	3.9	2.1	1.7	4.7	1.6	3.1	3.1

Note: The percentage changes are calculated in relation to the corresponding quarter of the previous year. Due to a temporary suspension in the trend series, hours worked data from the Labour Force are expressed in seasonally adjusted terms.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021; ABS, *Labour Force, Australia*, January 2022.

Chart 2.2: Productivity cycles, annualised growth in the market sector

Note: Multifactor productivity is measured as output per combined unit of labour and capital. Capital deepening is the component of labour productivity growth which is due to the increase in the amount of capital that each unit of labour has to work with. Labour productivity is represented by the numbers above the bars and is the sum of multifactor productivity and capital deepening. Due to rounding, the sum of multifactor productivity and capital deepening may not equal labour productivity. The current productivity cycle from 2017-18 is incomplete.

Source: ABS, *Australian System of National Accounts*, 2020-21 financial year; ABS, *Estimates of Industry Multifactor Productivity*, 2020-21 financial year.

Table 2.3: Average annual change in labour and multifactor productivity by industry

	2010–11 to 2020–21		2015–16 to 2020–21	
	Labour productivity	Multifactor productivity	Labour productivity	Multifactor productivity
	(% change)	(% change)	(% change)	(% change)
Agriculture, forestry and fishing	1.9	0.5	4.5	1.9
Mining	3.2	0.4	1.2	1.4
Manufacturing	0.6	0.5	0.2	0.5
Electricity, gas, water and waste services	–1.1	–1.7	–2.8	–2.4
Construction	0.6	–0.2	–0.4	–1.4
Wholesale trade	2.6	2.1	1.1	1.1
Retail trade	2.3	1.6	1.9	1.4
Accommodation and food services	–0.2	–0.1	–1.0	–1.1
Transport, postal and warehousing	–0.1	–1.2	–2.0	–2.8
Information, media and telecommunications	3.8	1.9	4.0	1.7
Financial and insurance services	0.3	1.0	–1.9	–0.2
Rental, hiring and real estate services	2.3	1.5	1.2	–0.3
Professional, scientific and technical services	1.5	1.1	1.9	1.5
Administrative and support services	0.6	0.6	1.2	1.1
Arts and recreation services	0.8	–0.1	–0.3	–1.2
Other services	1.2	0.2	1.6	0.4
Market sector industries	1.6	0.6	0.9	0.4

Note: Data are expressed in original terms. The market sector includes all industries except for Public administration and safety, Education and training and Health care and social assistance.

Chart 2.3: Unit labour costs, index

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021.

3. Business competitiveness and viability

Chart 3.1: Profits and wages shares of total factor income

Note: Profits share represents the returns to capital in the process of production, and is expressed as total corporation gross operating surplus as a proportion of total factor income. Wages share represents the returns to labour in the process of production, and is expressed as total compensation of employees as a proportion of total factor income.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021.

Table 3.1: Profits and wages shares of total factor income, year on year growth rates

	Wages share of total factor income	Total compensation of employees	Profits share of total factor income	Total corporation gross operating surplus	Gross mixed income	Gross mixed income
Quarter	(%)	(% change)	(%)	(% change)	(%)	(% change)
Dec-11	51.9	6.6	28.9	6.6	9.0	3.9
Dec-12	53.3	4.3	27.4	-3.9	8.7	-2.3
Dec-13	52.8	3.5	27.7	5.8	8.7	5.2
Dec-14	53.6	2.9	25.6	-6.4	9.7	13.3
Dec-15	54.6	3.1	24.6	-2.7	9.4	-1.8
Dec-16	52.2	2.1	26.7	15.8	10.0	12.6
Dec-17	53.0	5.3	26.5	3.0	9.3	-2.9
Dec-18	52.3	4.7	27.8	11.2	8.9	0.8
Dec-19	52.7	5.2	28.1	5.6	8.3	-1.5
Dec-20	50.9	2.1	29.4	10.5	9.2	16.9
Sep-21	50.1	4.7	30.3	1.3	9.4	-4.5

Note: Wages share is the compensation of employees expressed as a proportion of total factor income. Compensation of employees is defined as the total remuneration, in cash or in kind, payable by an enterprise to an employee in return for work done by the employee. Compensation of employees is not payable in respect of unpaid work undertaken voluntarily, including the work done by members of a household within an unincorporated enterprise owned by the same household. Compensation of employees excludes any taxes payable by the employer on the wage and salary bill (e.g. payroll tax).

Profits share represents the returns to capital in the process of production and is expressed as total corporation gross operating surplus as a proportion of total factor income. Gross operating surplus is defined as the operating surplus accruing to all enterprises, except unincorporated enterprises, from their operations in Australia. It is the excess of gross output over the sum of intermediate consumption, compensation of employees, and taxes less subsidies on production and imports. It is calculated before deduction of consumption of fixed capital, dividends, interest, royalties and land rent, and direct taxes payable, but after deducting the inventory valuation adjustment. Gross operating surplus is also calculated for general government and is equal to general government's consumption of fixed capital.

Gross mixed income is defined as the surplus or deficit accruing from production by unincorporated enterprises. It includes elements of both compensation of employees (returns on labour inputs) and operating surplus (returns on capital inputs).

The percentage change is calculated in relation to the corresponding quarter in the previous year.

Chart 3.4: Business bankruptcy rates

Note: The bankruptcy rate is the 'number of business-related bankruptcies divided by the number of owner managers of an unincorporated enterprise. The business bankruptcy rate is adopted from Bickerdyke I, Lattimore R, and Madge A (2000), *Business Failure and Change: An Australian Perspective*, Productivity Commission Staff Research Paper, Ausinfo, Canberra. Data are expressed in original terms.

The method of defining a business-related bankruptcy changed in 2020. A business-related bankruptcy was previously identified if the *main cause* of bankruptcy was from a business-related case. Under the new definition, a business-related case can be reported as *one of many* reasons causing bankruptcy and the debtor must have operated a business in the last 5 years. Data from 2007-08 has been revised to reflect this change.

Source: ABS, *Labour Force, Australia, Detailed*, December 2021; Australian Financial Security Authority, *Quarterly personal insolvency statistics*, December quarter 2021, <<https://www.afsa.gov.au/about-us/statistics/quarterly-personal-insolvency-statistics>>.

Chart 3.5: Business entry, exit and net entry rates

Note: Entry rates are business entries in the financial year as a proportion of total businesses operating at the start of the financial year. Exit rates are total business exits in the financial year as a proportion of total businesses operating at the start of the financial year. Net entry rates are the difference between the entry and exit rates and represent the percentage growth in the number of businesses over the respective financial year.

Source: ABS, *Counts of Australian Businesses, Including Entries and Exits*, various.

Chart 3.6: Business survival rates

Note: A surviving business is defined as a business which was actively trading in the first period and continued to be trading in the second period.

4. Inflation

Chart 4.1: Measures of inflation—Consumer Price Index, underlying inflation and Living Cost Index for employee households, growth rates

Note: Consumer Price Index (CPI) measures quarterly changes in the price of a ‘basket’ of goods and services which account for a high proportion of expenditure by the CPI population group (i.e. metropolitan households). The Living Cost Index (LCI) for employee households measures the change in the price of a ‘basket’ of goods and services which is based on the expenditure of employee households whose principal source of income comes from wages and/or salaries. CPI and LCI data are expressed in original terms.

Underlying inflation is calculated as the average of the trimmed mean and weighted median. The trimmed mean is calculated by ordering the CPI expenditure class components by their price change in the quarter and taking the expenditure weighted average of the middle 70 per cent of these price changes. The weighted median is the price change of the component in the middle of this ordering.

Source: ABS, *Consumer Price Index, Australia*, December 2021; ABS, *Selected Living Cost Indexes, Australia*, December 2021.

Table 4.1: Consumer Price Index, underlying inflation, Living Cost Index for employee households, index and growth rate over the year

Quarter	Consumer Price Index	Consumer Price Index	Underlying inflation	Underlying inflation	Employee LCI	Employee LCI
	(Index)	(% change)	(Index)	(% change)	(Index)	(% change)
Dec-11	100.0		100.0		100.0	
Dec-12	102.2	2.2	102.3	2.3	100.7	0.7
Dec-13	105.0	2.7	105.2	2.8	102.0	1.3
Dec-14	106.8	1.7	107.6	2.3	103.6	1.6
Dec-15	108.6	1.7	109.8	2.0	104.7	1.1
Dec-16	110.2	1.5	111.2	1.3	105.8	1.0
Dec-17	112.3	1.9	113.2	1.8	107.9	2.0
Dec-18	114.3	1.8	115.3	1.8	109.9	1.9
Dec-19	116.4	1.8	116.9	1.4	111.0	1.0

Dec-21	121.5	3.5	121.5	2.7	113.4	2.6

Note: CPI and the LCI data are expressed in original terms. The percentage change is calculated in relation to the corresponding quarter in the previous year. Underlying inflation is the average of the trimmed mean and weighted median.

Source: ABS, *Consumer Price Index, Australia*, December 2021; ABS, *Selected Living Cost Indexes, Australia*, December 2021.

Chart 4.2: Consumer Price Index, underlying inflation and Living Cost Index for employee households, cumulative growth rates

Note: CPI and the LCI data are expressed in original terms. Underlying inflation is the average of the trimmed mean and weighted median.

Source: ABS, *Consumer Price Index, Australia*, December 2021; ABS, *Selected Living Cost Indexes, Australia*, December 2021.

Table 4.2: Measures of underlying inflation, growth rates over the year

Quarter	Trimmed mean	Weighted median
	(% change)	(% change)
Dec-11	2.7	2.5
Dec-12	2.2	2.5
Dec-13	2.7	2.9
Dec-14	2.2	2.4
Dec-15	2.1	2.0
Dec-16	1.5	1.2
Dec-17	1.7	1.9
Dec-18	1.8	1.9
Dec-19	1.5	1.2
Dec-20	1.2	1.4
Dec-21	2.6	2.7

Note: The trimmed mean is calculated by ordering the CPI expenditure class components by their price change in the quarter and taking the expenditure weighted average of the middle 70 per cent of these price changes. The weighted median is the price change of the component in the middle of this ordering. The percentage change is calculated in relation to the corresponding quarter in the previous year.

Source: ABS, *Consumer Price Index, Australia*, December 2021.

Chart 4.3: Non-discretionary and discretionary inflation, cumulative growth rates

Note: The ABS define non-discretionary expenditure as goods or services that are purchased because they meet a basic need (food, shelter, healthcare), are required to maintain current living standards, or are a legal obligation. Discretionary expenditure includes goods or services that could be considered as 'optional' purchases.

Source: ABS, *Consumer Price Index, Australia*, December 2021.

Table 4.3: Non-discretionary and discretionary inflation, growth rates over the year

Quarter	Non-discretionary	Discretionary	Discretionary excluding tobacco
	(% change)	(% change)	(% change)
Dec-11	4.2	1.5	1.2
Dec-12	3.4	0.6	0.3
Dec-13	3.1	1.9	1.4
Dec-14	1.7	1.7	0.7
Dec-15	1.1	2.6	1.7
Dec-16	1.8	1.0	-0.1
Dec-17	2.4	1.2	0.1
Dec-18	1.5	2.2	1.2
Dec-19	1.5	2.5	1.5
Dec-20	-0.6	2.9	1.2
Dec-21	4.5	1.9	2.0

Note: The ABS define non-discretionary expenditure as goods or services that are purchased because they meet a basic need (food, shelter, healthcare), are required to maintain current living standards, or are a legal obligation. Discretionary expenditure includes goods or services that could be considered as 'optional' purchases.

5. Wages

Chart 5.1: Measures of nominal wages growth, quarterly and cumulative growth rates, index

Note: The Wage Price Index (WPI) is an index for total hourly rates of pay excluding bonuses that is unaffected by changes in the quality or quantity of work performed. Average weekly ordinary time earnings (AWOTE) is calculated by dividing estimates of weekly ordinary time earnings by estimates of the number of employees. Ordinary time earnings refer to earnings attributable to award, standard or agreed hours of work. It is calculated before taxation and other deductions such as superannuation. It also excludes payments which are not related to the reference period such as overtime, leave loading and redundancy payments. AWOTE estimates refer to full-time adult employees, where an adult is defined as those who are 21 years or over as well as employees who, although under 21 years of age, are paid at the full adult rate for their occupation. AWOTE data are published half-yearly in May and November and a quarterly series has been derived. AWOTE data are expressed in original terms. Average annualised wage increase (AAWI) measures the average percentage increase in the base rates of pay across federal enterprise agreements approved in each quarter. It does not take into account payments such as allowances, bonuses and increases linked to productivity. The AAWI index is calculated by first deriving a quarterly rate. The C14 and the C10 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2010* and the *Manufacturing and Associated Industries and Occupations Award 2020*.

Source: ABS, *Employees Earnings and Hours, Australia*, May 2021.

Chart 5.3: Change in total wages, by gender, 14 March 2020 to 15 January 2022

Note: Wages data are more sensitive to period-to-period changes in reporting than jobs data and are therefore subject to greater revisions over time. They are also subject to a greater degree of seasonality. Records where the characteristic is unknown (i.e. sex) are included in the all persons index total and can result in independent movement from the component indexes.

Dec-20	198.8	12.7	22.0
Dec-21	147.3	-25.9	25.6
Jan-22	151.5	-30.3	26.1

Note: Due to a temporary suspension in the trend series, aggregate data are expressed in seasonally adjusted terms. The long-term unemployed refers to the number of persons unemployed for 52 weeks or more. The long-term unemployment ratio refers to the number of long-term unemployed persons expressed as a percentage of the total unemployed population. The percentage change is calculated in relation to the corresponding month in the previous year. For information on the reasons for long-term unemployment, see Table 15 in the ABS' [Participation, Job Search and Mobility](#).

Chart 6.7: Proportion of all underemployed persons, by industry, November 2021

Note: Data are in original terms.

Source: ABS, *Labour Force, Australia, Detailed*, January 2022.

Chart 6.8: Hours-based underemployment rate and proportion employed part time, by industry, 2020–21

Note: The hours-based underemployment rate is calculated as the number of additional hours sought by underemployed persons expressed as a percentage of the total available hours of labour supply. The total available hours of labour supply are defined as the number of hours actually worked in all jobs plus the number of hours sought by the underemployed persons. Hours sought by unemployed persons are not included. Hours sought but not worked is taken from the Labour Force Survey. Proportion of those employed part-time by industry is calculated at the May quarter 2021.

Source: ABS, *Labour Account Australia*, September 2021; ABS, *Labour Force, Australia, Detailed*, January 2022.

Chart 6.9: Change in payroll jobs, by sex, 14 March 2020 to 15 January 2022

Chart 6.12: Proportion of vacant jobs (job vacancy rate), by industry, September quarters 2021 and 2020

Note: The proportion of vacant jobs is defined as the number of 'unfilled jobs' as a proportion of the number of 'total jobs'.
Source: ABS, *Labour Account Australia*, September 2021.

7. Award reliance

Chart 7.1: Method of setting pay

Note: Awards refers to the proportion of employees in an industry that are paid exactly the award rate and are not paid more than that rate of pay. As defined by the ABS, individual arrangements include registered or unregistered individual agreements and owner managers of incorporated businesses. Estimates of the proportion of employees on awards and collective agreements in 2016 have been revised on the basis of the 2018 conceptual treatment of these methods of payment. Owner managers of incorporated businesses comprised the following proportion of all employees: 2012 = 3.3%; 2014 = 3.4%; 2016 = 3.6%; 2018 = 3.8%; 2021 = 4.1 %.

Source: ABS, 'A Guide to Understanding Employee Earnings and Hours Statistics', Feature Article, in *Employee Earnings and Hours, Australia, May 2018*; ABS, *Employee Earnings and Hours, Australia*, various.

Table 7.1: Award reliance by industry

	2012	2014	2016*	2018*	2021
	(%)	(%)	(%)	(%)	(%)
All industries	16.1	18.8	22.4	22.5	23.0
Mining	0.6	0.8	0.1	0.9	1.1
Manufacturing	11.3	15.7	17.7	20.8	19.1

Construction	10.6	13.7	19.7	16.6	13.4
Wholesale trade	8.1	11.9	16.8	16.1	10.0
Retail trade	25.6	28.5	34.5	30.1	29.6
Accommodation and food services	44.8	42.8	42.7	44.9	60.4
Transport, postal and warehousing	7.3	10.9	11.9	12.7	12.6
Information media and telecommunications	5.7	5.2	5.5	7.1	7.3
Financial and insurance services	4.7	5.0	3.6	5.2	5.1
Rental, hiring and real estate services	20.9	22.1	27.2	29.4	22.1
Professional, scientific and technical services	6.0	9.9	9.3	8.0	5.7
Administrative and support services	29.0	37.3	42.0	41.3	42.4
Public administration and safety	6.9	12.8	15.2	10.9	13.0
Education and training	6.8	5.1	8.5	10.0	7.8
Health care and social assistance	19.0	22.3	27.8	31.7	33.3
Arts and recreation services	19.7	22.0	26.2	22.5	26.6
Other services	24.6	25.1	34.3	38.1	38.1

Note: * Only presented for non-managerial employees in 2016 and 2018 as data for all employees by method of setting pay and industry are not available. Estimates of the proportion of employees on awards and collective agreements in 2016 have been revised on the basis of the 2018 conceptual treatment of these methods of payment.

Award reliance refers to the proportion of employees in an industry that are paid exactly the award rate and are not paid more than that rate of pay.

Source: ABS, 'A Guide to Understanding Employee Earnings and Hours Statistics', Feature Article, in *Employee Earnings and Hours, Australia*, May 2018; ABS, *Employee Earnings and Hours, Australia*, various.

Table 7.2: Economic indicators by award-reliant industries

	Accommodation and food services	Administrative and support services	Other services	Health care and social assistance	Retail trade	All industries
Percentage of employees reliant on award wages, May 2021 ^a	60.4	42.4	38.1	33.3	29.6	23.0
Gross value added: percentage growth over the year to September quarter 2021	-14.4	15.0	2.9	3.8	-0.2	4.0
Company gross operating profits: percentage growth over the year to December quarter 2021 ^b	-60.4	-37.2	-34.0	n/a	-27.5	13.0
Business entry rate, over year to June 2021	17.9	20.3	17.9	15.2	18.2	15.8
Business exit rate, over year to June 2021	12.8	15.1	10.6	8.0	11.9	12.0
Wage Price Index: percentage growth over the year to December quarter 2021 ^a	3.5	2.0	2.3	2.4	2.6	2.3
Percentage annual wage growth under new collective agreements September quarter 2021	2.0	4.4	2.8	2.1	3.1	2.7
Employment: percentage increase over the year to November quarter 2021	2.8	-0.7	16.0	8.1	-0.3	2.7
Hours worked: percentage increase over the year to November quarter 2021	1.3	1.6	18.5	9.0	0.4	2.7

Note: (a) All industries excludes Agriculture, forestry and fishing; (b) All industries excludes Education and training, Health care and social assistance and some subdivisions of Finance and insurance services. n/a = not available.

The award-reliant industries selected are the five industries with the highest proportion of employees reliant on award rates of pay according to the Employee Earnings and Hours 2021 survey. The WPI and actual hours worked data are expressed in original terms. Due to a temporary suspension in the trend series, employment data are expressed in seasonally adjusted terms.

Entry rates are business entries in the financial year as a proportion of total businesses operating at the start of the financial year. Exit rates are total business exits in the financial year as a proportion of total businesses operating at the start of the financial year.

Source: ABS, *Australian National Accounts: National Income, Expenditure and Product*, September 2021; ABS, *Business Indicators, Australia*, December 2021; ABS, *Counts of Australian Businesses, including Entries and Exits*, July 2017 to June 2021; ABS, *Employee Earnings and Hours, Australia*, May 2021; ABS, *Labour Force, Australia, Detailed*, January 2022, ABS, *Wage Price Index, Australia*, December 2021; Attorney-General's Department, *Trends in Federal Enterprise Bargaining*, September quarter 2021, <<https://www.ag.gov.au/industrial-relations/enterprise-agreements-data/Pages/trends-in-federal-enterprise-bargaining.aspx>>.

8. Relative living standards

Table 8.1: NMW relative to median weekly earnings of full-time employees

Month	NMW	Median earnings of full-time employees in main job	Ratio of NMW to median earnings in main job
	(\$)	(\$)	(%)
Aug-11	589.30	1100	53.6
Aug-12	606.40	1150	52.7
Aug-13	622.20	1153	54.0
Aug-14	640.90	1208	53.1
Aug-15	656.90	1233	53.3
Aug-16	672.70	1250	53.8
Aug-17	694.90	1284	54.1
Aug-18	719.20	1344	53.5
Aug-19	740.80	1380	53.7
Aug-20	753.80	1430	52.7
Aug-21	772.60	1500	51.5

Note: Median earnings refers to the level of earnings that divides the distribution into two groups of equal size, one having earnings above and the other below that amount. The median is less affected by outliers and skewed data than the mean. The median earnings data reflects revised estimates as result from a rebenchmarking of estimates. Median earnings are presented to the nearest dollar.

Source: ABS, *Characteristics of Employment, Australia*, various; FWA/FWC decisions.

Table 8.2: Two-thirds of median weekly earnings

Year	COE	EEH
	(\$)	(\$)
2012	766.67	808.00
2013	768.67	n/a
2014	805.50	879.33
2015	822.10	n/a
2016	833.33	917.33
2017	856.00	n/a
2018	896.00	973.33
2019	920.00	n/a
2020	953.33	n/a
2021	1000.00	1062.00

Note: Data for both measures of median weekly earnings include amounts salary sacrificed. Weekly earnings from the COE are earnings in the main job for full-time employees and are for August of each year. Weekly earnings from the EEH are weekly total cash earnings for full-time non-managerial adult employees. The figures are for May of each year. n/a = not available.

Source: ABS, *Characteristics of Employment, Australia*, various; ABS, *Employee Earnings and Hours, Australia*, various.

Chart 8.1: Growth in NMW, C10, AWOTE, AWE and WPI, index

Note: This chart reflects available data for the period December quarter 2010 to March quarter 2021. See Chart 5.1 for information on the WPI and AWOTE. Average weekly earnings (AWE) is the gross (before tax) earnings of employees (excluding salary sacrifice). AWOTE and AWE are published half-yearly for May and November, hence, a quarterly series has been derived. AWOTE and AWE data are expressed in original terms. The C10 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2010*. In the Annual Wage Review 2019–20, the operative date of the variation to the C10 rate was on 1 November 2020.

Source: ABS, *Average Weekly Earnings, Australia*, November 2021; ABS, *Wage Price Index, Australia*, December 2021; *Manufacturing and Associated Industries and Occupations Award 2010*; *Manufacturing and Associated Industries and Occupations Award 2020*.

Chart 8.2: Real weekly total earnings (full-time adult non-managerial employees) by percentile and the real NMW, index

Note: Earnings data for 2014, 2016, 2018, and 2021 are based on full-time non-managerial employees paid at the adult rate.

Source: ABS, *Consumer Price Index, Australia*, December 2021; ABS, *Employee Earnings and Hours, Australia*, various; *Manufacturing and Associated Industries and Occupations Award 2010*; *Manufacturing and Associated Industries and Occupations Award 2020*.

Table 8.3: Ratio of selected percentiles to the mean and median of real weekly total earnings (full-time adult non-managerial employees)

	2012	2014	2016	2018	2021
Ratio of selected percentiles to mean real earnings					
10 th percentile	0.56	0.56	0.55	0.56	0.56
25 th percentile	0.68	0.67	0.67	0.67	0.68
50 th percentile	0.88	0.87	0.88	0.88	0.88
75 th percentile	1.19	1.18	1.18	1.20	1.19
90 th percentile	1.57	1.57	1.57	1.56	1.55
Ratio of selected percentiles to median real earnings					
10 th percentile	0.63	0.63	0.63	0.64	0.64
25 th percentile	0.77	0.77	0.76	0.76	0.76

Note: Earnings data for 2014, 2016, 2018, and 2021 are based on full-time non-managerial employees paid at the adult rate. Median earnings refer to the level of earnings that divides the distribution into two groups of equal size, one having earnings above and the other below that amount. The median is less affected by outliers and skewed data than the mean.

Source: ABS, *Employee Earnings and Hours, Australia*, various.

Chart 8.3: C14 rate relative to median earnings of employees in main job

Note: Median earnings are measured in August of each year. Following the amendments to the *Workplace Relations Act 1996* (Cth) taking effect in 2006, the Federal Minimum Wage (FMW) was set at \$12.75 per hour, equivalent to \$484.50 per week. The C14 rate in 2020 reflects the amount as at 1 November 2020 (\$753.80). Earnings are for employees including owner managers of incorporated enterprises.

Median earnings from 2004 onwards are taken from the COE survey, with median hourly earnings of adult employees sourced from unpublished COE data. The median earnings data reflect revised estimates as a result of rebenchmarking.

Source: ABS, *Characteristics of Employment, Australia*, various; ABS, *Employee Earnings, Benefits and Trade Union Membership, Australia*, various; ABS, *Weekly Earnings of Employees (Distribution), Australia*, various; *Metal, Engineering and Associated Industries Award 1998*; *Manufacturing and Associated Industries and Occupations Award 2010*, *Manufacturing and Associated Industries and Occupations Award 2020*.

Table 8.4: Nominal disposable income of selected NMW-reliant households

Household type	Disposable income	Change		
	July 2021	July 2020 to July 2021	July 2020 to July 2021	July 2016 to July 2021
	(\$pw)	(\$pw)	(%)	(%)
Single adult	697.23	15.33	2.2	15.0
Single parent working FT, 1 child	970.35	18.01	1.9	11.0
Single parent working PT, 1 child	643.97	11.71	1.9	8.0
Single parent working FT, 2 children	1081.09	18.99	1.8	9.3
Single parent working PT, 2 children	754.71	12.69	1.7	6.1
Single-earner couple (with NSA/JSP)	924.92	-291.20	-23.9	15.9
Single-earner couple	710.74	13.82	2.0	13.6
Single-earner couple, 1 child (with NSA/JSP)	1114.33	-227.80	-17.0	12.0
Single-earner couple, 1 child	970.35	18.01	1.9	11.0
Single-earner couple, 2 children (with NSA/JSP)	1231.98	-219.90	-15.1	10.9
Single-earner couple, 2 children	1081.09	18.99	1.8	9.3
Dual-earner couple	1083.53	24.72	2.3	14.9
Dual-earner couple, 1 child	1270.72	21.77	1.7	10.6
Dual-earner couple, 2 children	1381.46	22.75	1.7	9.1
CPI			3.8	9.4

Note: The percentage change in the CPI over July 2020 to July 2021 and July 2016 to July 2021 were calculated with reference to the June quarter. CPI data are expressed in original terms.

Assumptions: Single-earner households earn 100 per cent of the weekly NMW. Single parents working part time (PT) earn 50 per cent of the weekly NMW, those working full time (FT) earn 100 per cent. Dual-earner households comprise one partner earning 100 per cent of the NMW, the other earns 50 per cent. Applicable NMW rates per week are: \$672.70 in July 2016; \$753.80 in July 2020 and \$772.60 in July 2021.

Tax/transfer parameters as at July each year. Disposable income includes all available income transfers, unless otherwise specified. Children are aged 8–12 years and attending primary school. Households paying sufficient rent to receive maximum Rent Assistance where applicable. From 20 March 2020 the Newstart Allowance (NSA) was replaced by the JobSeeker Payment (JSP). Single-earner couples are modelled in two scenarios: 1) the non-earning partner is in the labour force and receiving proportional rates of NSA or JSP and 2) the non-earning partner is not in the labour force and therefore not in receipt of NSA or JSP. Recipients of JSP in July 2020 also received the Coronavirus Supplement at \$550 per fortnight. A person who was in receipt of JSP or Family Tax Benefit between 12 March 2020 and 13 April 2020 were also eligible to receive a tax-free \$750 Economic Support Payment. This has not been modelled, but if applied, the single-earner couple (with JSP) household and households with children would have received a further \$14.42 per week in disposable income on average. The Coronavirus Supplement and the Economic Support Payment ceased from March 2021. Single-parent households and secondary earners in dual-earner households are not seeking further work and not in receipt of income support. The disposable income of households receiving the JobKeeper Payment from their employer as their income has not been modelled.

Households with children receive the fixed value of the Schoolkids Bonus in 2013–2016. Disposable incomes for households with children for 2013 to 2016 reflect the average weekly rate of Schoolkids Bonus instalments in the given year. In 2013 the Schoolkids Bonus accounted for a weekly average of \$7.88 per child in the disposable income for all households with children modelled (excepting dual earner households earning AWOTE as they were not eligible for this transfer). The Schoolkids Bonus was not payable from 2017.

Source: ABS, *Consumer Price Index, Australia*, December 2021; Fair Work Commission modelling.

Table 8.5: Modelling the 2021 NMW increase, wage increase retained and components of change in disposable income of selected NMW-reliant households, July 2021

Household type	Change in disposable income	Components of change			NMW increase retained
		Wage increase	Taxes	Transfers	
		(\$ pw)	(\$)	(\$)	
Single adult	15.32	18.80	-3.48	0.00	81.5
Single parent working FT, 1 child	15.70	18.80	-3.10	0.00	83.5
Single parent working PT, 1 child	9.40	9.40	0.00	0.00	100.0
Single parent working FT, 2 children	15.70	18.80	-3.10	0.00	83.5
Single parent working PT, 2 children	9.40	9.40	0.00	0.00	100.0
Single-earner couple (with NSA/JSP)	3.44	18.80	-4.08	-11.28	18.3
Single-earner couple	13.82	18.80	-4.98	0.00	73.5
Single-earner couple, 1 child (with NSA/JSP)	5.69	18.80	-4.08	-9.03	30.3
Single-earner couple, 1 child	15.70	18.80	-3.10	0.00	83.5
Single-earner couple, 2 children (with NSA/JSP)	6.06	18.80	-3.71	-9.03	32.2
Single-earner couple, 2 children	15.70	18.80	-3.10	0.00	83.5
Dual-earner couple	24.72	28.20	-3.48	0.00	87.7
Dual-earner couple, 1 child	17.22	28.20	-3.48	-7.50	61.1
Dual-earner couple, 2 children	17.22	28.20	-3.48	-7.50	61.1

Note: Tax/transfer parameters as at July 2021. The NMW increase retained is calculated as the change in disposable income as a proportion of the wage increase. Other assumptions as per Table 8.4.

Source: Fair Work Commission modelling.

Chart 8.4: Growth in real weekly household disposable income for selected NMW-reliant households, index

Note: Tax/transfer parameters and NMW rate as at July of each year. Other assumptions as per Table 8.4. Between July 2013 and July 2014, the income-free threshold for NSA increased.

Real weekly household disposable income is adjusted with reference to the June quarter CPI.

Fair Work Commission

Note: Poverty lines are based on estimates of median equivalised household disposable income in 2015–16 for September 2016 and 2017–18 for September 2020 and September 2021, and adjusted for movements in household disposable income per head as calculated by the Melbourne Institute of Applied Economic and Social Research, and adjusted for household composition using the modified OECD equivalence scale. The C14, C10 and C4 are minimum award rates set under the *Manufacturing and Associated Industries and Occupations Award 2010*. AWOTE data are expressed in original terms.

Assumptions: Tax-transfer parameters as at September 2016, September 2020 and July 2021. Wage rates for 2016: C14 = \$672.70 pw, C10 = \$783.30 pw, C4 = \$940.90 and AWOTE of full-time adult employees = \$1533.40 pw. Wage rates for 2020: C14 = \$740.80 pw, C10 = \$862.50 pw, C4 = \$1036.10 pw, AWOTE of full-time adult employees = \$1711.60. Wage rates for 2021: C14 = \$772.60 pw, C10 = \$899.50 pw, C4 = \$1080.60 pw and AWOTE of full-time adult employees = \$1748.40. In the Annual Wage Review 2019–20 the variation to C14, C10 and C4 operated from 1 November 2020. Other assumptions as per Table 8.4.

Chart 8.5: Gini coefficient of equivalised household disposable income

Note: Estimates presented for 2007-08 onwards are not directly comparable with estimates for previous cycles due to improvements made to measuring income introduced in the 2007-08 cycle. Estimates for 2003-04 and 2005-06 have been recompiled to reflect those improvements; however, not all components introduced in 2007-08 were available for earlier cycles.

11. Equal remuneration

Table 11.1: Estimates of the gender pay gap

Measure	Male earnings	Female earnings	Gender pay gap
	(\$)	(\$)	(%)
AWOTE (November 2021)	1846.50	1591.20	13.8
EEH adult hourly ordinary time cash earnings (May 2018)*	42.07	35.66	15.2
EEH full-time non-managerial adult hourly ordinary time cash earnings (May 2021)	47.50	43.30	8.8

Note: AWOTE refer to full-time adult employees. The gender pay gap is calculated as the difference between female's and male's earnings, expressed as a percentage of male's earnings.

* Earnings are deflated by a casual loading of 25 per cent.

Source: ABS, *Average Weekly Earnings, Australia*, November 2021; ABS, *Microdata: Employee Earnings and Hours, Australia*, May 2018; ABS, *Employee Earnings and Hours, Australia*, May 2021.

12. Indicators of financial stress

Table 12.1: Financial stress experienced by all employee households

	2016	2017	2018	2019	2020
Financial stress indicators	(%)	(%)	(%)	(%)	(%)
Unable to raise \$3000/\$4000* in a week for something important	4.7	4.5	5.0	4.8	4.6
Could not pay electricity, gas or telephone bills on time	7.3	7.3	7.4	7.4	4.9
Could not pay the mortgage or rent on time	3.4	2.9	4.0	4.0	3.2
Pawned or sold something	2.3	2.2	2.5	2.8	1.9
Went without meals	1.5	1.6	2.0	2.3	1.4
Could not afford to heat home	1.2	1.6	1.7	1.8	1.0
Sought assistance from welfare/community organisation	0.9	1.0	1.1	1.1	1.3
Sought financial help from friends or family	6.8	6.1	7.3	7.3	3.9
Any stress	14.5	13.4	14.7	15.2	12.1
Low stress (1–2)	10.9	9.9	10.5	10.7	9.6
Moderate stress (3–4)	2.8	2.6	3.1	3.5	1.8
High stress (5 or more)	0.8	0.9	1.1	1.0	0.7
Observations	4996	5011	4988	5117	4970

Note: Employee households are those households whose main source of income is from wages or salary. Both partners in a couple family household, the lone parent in a lone parent household and the lone person of a lone person household must report financial stress for that particular household to be considered as such. Observations from multi-family households, other related family households and group households are excluded. *Amount is \$3000 for Waves 16 to 19, and \$4000 for Wave 20.

Source: *Household, Income and Labour Dynamics in Australia Survey, Waves 16–20.*

Table 12.2: Financial stress experienced by low-paid employee households

	2016	2017	2018	2019	2020
Financial stress indicators	(%)	(%)	(%)	(%)	(%)
Unable to raise \$3000/\$4000* in a week for something important	10.8	12.9	13.3	12.2	9.6
Could not pay electricity, gas or telephone bills on time	13.2	14.6	15.4	16.4	10.0
Could not pay the mortgage or rent on time	6.8	5.6	7.9	9.6	6.1
Pawned or sold something	4.9	4.5	4.7	6.4	4.8
Went without meals	3.0	2.8	3.8	5.5	3.1
Could not afford to heat home	2.7	3.4	4.1	3.9	2.2
Sought assistance from welfare/community organisation	2.1	2.6	3.9	2.6	3.8

Any stress	27.4	28.2	29.0	31.6	24
Low stress (1–2)	18.7	20.2	18.1	20.3	18.3
Moderate stress (3–4)	6.7	6.0	7.8	9.1	3.6
High stress (5 or more)	2.0	2.0	3.1	2.2	2.1
Observations	972	1023	981	1022	1011

Note: Employee households are those households whose main source of income is from wages or salary. Both partners in a couple family household, the lone parent in a lone parent household and the lone person of a lone person household must report financial stress for that particular household to be considered as such. Observations from multi-family households, other related family households and group households are excluded. Low-paid employee households are defined as those households in the bottom quintile of equivalised disposable household income for employee households. Disposable household income is equivalised using the 'modified OECD' method where each person in the household is given a score (1 for the first adult, 0.5 for subsequent adults and 0.3 for each child under the age of 15) and the income is divided by the sum of these scores. *Amount is \$3000 for Waves 16 to 19, and \$4000 for Wave 20.

Terms of trade ^(h)	10.4	0	–18
Current account balance (per cent of GDP)	3.4	1½	–4¼
Net overseas migration ⁽ⁱ⁾	–100 000	–41 000	180 000

Note: The detailed forecasts for the domestic economy are based on several technical assumptions. The exchange rate is assumed to remain around its recent average level — a trade-weighted index of around 64 and a \$US exchange rate of around 77 US cents. Interest rates are assumed to move broadly in line with market expectations. World oil prices (Malaysian Tapis) are assumed to remain around US\$65/barrel. Population growth is around 0.1 per cent in 2020–21, 0.2 per cent in 2021–22 and 0.8 per cent in 2022–23.

(a) Percentage change on preceding year unless otherwise indicated.

(b) Calculated using original data unless otherwise indicated.

(c) Excluding second-hand asset sales from the public sector to the private sector.

(d) Percentage point contribution to growth in GDP.

(e) Through-the-year growth rate to the June quarter.

(f) Seasonally adjusted, through-the-year growth rate to the June quarter.

(g) Seasonally adjusted rate for the June quarter.

(h) The detailed forecasts are underpinned by price assumptions for key commodities: Iron ore spot price assumed to decline to US\$55/tonne free-on-board (FOB) by the end of the June quarter 2022; metallurgical coal spot price assumed to decline to US\$130/tonne FOB; and thermal coal spot price assumed to decline to US\$60/tonne FOB.

(i) The figure for 2020-21 consists of three quarters of preliminary actuals and one quarter of forecasts.

17. Business surveys

In the Annual Wage Review 2015–16 Decision, the Expert Panel noted that:

Official statistics on the situation of small business come with a substantial time lag. We accept that in these circumstances, the information provided by business surveys is useful. In particular, we note the assessment by the Australian Government and the RBA that information from the main business surveys (by ACCI, NAB and Sensis) have proved to be quite reliable predictors of output and employment growth. [2016 FWCFB 3500 at para. 298]
